

Historic Hawaii Foundation

Letter 15SEPT08 They anticipate being a consulting/concurring party for the MOA. Stated, "... appropriate mitigation commitments should be proposed." In regard to the fact that Project is going over historic bridges. (page 2)

Recommended mitigations: (page 3)

- Public access to documentation: have a web-based research platform with historic inventory information (interactive, geo-coded). Could be combined with State's inventory. Other potential partners could be OHA & DOD.
- National Register nominations: nominate identified 76 parcels or districts that are eligible
- City & County of Honolulu Preservation Program: establish a local preservation program consistent with Certified Local Government Program requirements, appoint qualified preservation staff, provide for on-going training and participation in land use matters
- Main Street program: support re-establishment of Main Street program, either by serving as the coordinator or cooperating with another coordinating agency, provide dedicated funds for implementation throughout life of the Project
- Restoration of Historic Irwin park: restore as an urban green space
- Station Design and Context Sensitive Solutions: designs should be responsive and unique

Letter 10DEC08 Concern about historic resources – no discussion of PA/MOA. Reminded of mitigations provided in 15SEPT08 letter. Requested a commitment to providing mitigation measures, timelines, and responsible parties be included in FEIS and ROD, in addition to any Section 106 documentation.

Oahu Island Burial Council

Meeting 9JULY08 Made motion to request in a letter to ACHP that OIBC be given signatory status to the MOA

Meeting 13AUG08 No minutes posted

Meeting 10SEPT08 Concern that not having signatory status would dilute MOA's effectiveness and City would be able to break MOA. Worried about how Archaeological Inventory

Survey (AIS) process would fit with MOA. Decision to create task-force to discuss MOA. Task force progress to be reported monthly at OIBC meetings.

Meeting 8OCT08	Decided to do corridor tour
Meeting 12NOV08	Bus tour day.
Meeting 10DEC08	Discussed schedule of subcommittee (formerly task force) meetings.
Meeting 14JAN09	Discussed PA. Two major points: ensure process does not shortchange the AIS process, make sure OIBC can review burial and archaeological plans.
Meeting 11FEB09	OIBC advised that PA and MOA will be combined.
Meeting 11MAR09	Discussed AIS. Need to see mitigation plans and ensure inclusion in the MOA (expected to see plans at 8APR09 meeting)
Meeting 8APR09	No discussion of MOA

no other meeting notes published

Office of Hawaiian Affairs

Letter 23SEPT08	Regarding DTS letter concerning participating agency update enclosures (P&N; alternatives; and archaeological, cultural, and historic technical reports). Deferred to OIBC on decision-making authority for MOA. Advocated that OIBC & OHA be invited signatories to the MOA.
Letter 2FEB09	Response to DEIS. Request OHA be included as a consulting party to the MOA and continued consultation. Advocates for archaeological monitoring and to have an approved monitoring plan pursuant to the MOA. Request MOA provide direction on mitigation.
Meeting 15JUL09	Project update presented to OHA staff.

State Historic Preservation Division

Meeting 27JAN08?	Update Chinatown Nomination as a mitigation
Letter 26SEPT08	Response to Purpose & Need and Alternatives Chapters, as well as, Historic Resources Technical Report. Supported

suggestions offered by Historic Hawaii Foundation as proportional to the direct, indirect, and cumulative impacts of the corridor. Added request to digitize office's Oahu island inventory. If possible, provide historic and contemporary Sanborn Fire Insurance maps to their office. Stated their office "appreciated" offers of HABS, interpretative signage, cultural landscape reports, historic context reports, and multiple property NRHP submissions. Restates that these are to be considered with HHF's proposed mitigations.
